A lecture by
Dr Chengxuan Qiu

Cerebral Small Vessel Disease and Cognitive Decline in Ageing

Dr Chengxuan Qiu is an Associate Professor and Senior Lecturer in epidemiology at Karolinska Institutet, Stockholm, Sweden. His research has been based on several large population studies, such as the Kungsholmen Project (KP), Swedish National study on Aging and Care in Kungsholmen (SNAC-K)/SNAC-K MRI study), and Swedish Brain Power Project. His aim is to develop intervention strategies towards healthy brain ageing through investigating cardiovascular risk factors and vascular mechanisms in pathological brain ageing and related cognitive and physical dysfunction from the life-course perspective.

Date: Monday, 5 December 2016
